

Fonetastic

Fonetastic

Not just an app, but a friend for your phone.

Product Highlights

Fonetastic is an all-in-one app for Android devices. Built with multiple productivity and security features, it enhances your device's performance, and stops Internet threats such as malware and infected websites. The app also lets you protect your apps and personal information like pictures, videos, messages, etc., with a PIN.

- › Helps your device perform faster
- › Enhances your phone's battery life
- › Locks your apps like Facebook, Twitter, Gmail, etc.
- › PIN protects your photos, videos, messages and other personal information
- › Fights Android viruses and malware
- › Tracks your phone if lost or stolen
- › Blocks unsafe and infected websites

Features

Optimization

Speed

Enhance your device's performance by killing running apps that are idle and not being used.

Battery

Keep a track of your device's battery life, and kill running apps that drain battery power. Notifies you with an alarm sound when battery level becomes critically low. You can configure settings and disable unnecessary apps that consume too much battery.

Storage

Clean cache, move data from internal storage to SD card and vice versa. Securely delete personal data to prevent any misuse.

Data Usage

Track and set your cellular data limit to manage your data usage. This helps you ensure that your data is not used unnecessarily. You can set your data plan depending on your monthly or weekly requirement. After you set the plan, you can view the remaining days and mobile data.

Floating Window

An easy shortcut that lets you free up RAM, kill running apps, and toggle between shortcuts like Wi-Fi, Ringtones, Bluetooth, Cache Cleaner, and more. The Floating Window icon can be viewed on the Home and App list screen of the device. Tapping the icon launches a window that displays a Status Button, Switch ring, and App ring.

- › **Status button:** displays the percentage of RAM consumed by apps currently running in the device. Tapping the button frees up the RAM.
- › **Switch ring:** lets you toggle between shortcuts such as Wi-Fi, Bluetooth, Torch Light, Brightness, Ringtones, Battery, and Cache Cleaner.
- › **App ring:** displays apps that are currently running in the device. An app can be killed by tapping on it; this boosts the device speed.

Privacy

App Access

Lock WhatsApp, Snapchat, Twitter, Tumblr, Messaging, Gallery, Skype, Camera, Gmail, and any app on your phone that you think can affect your privacy. You can lock both system and downloaded apps with this feature.

Vault

Keep your personal images, confidential documents, videos, call logs and messages private by keeping them in a PIN-protected folder. It consists of a Contacts Vault and a Gallery Vault. Images captured by

Intruder Detection gets automatically saved in the Gallery Vault.

Block Numbers

Block calls and messages from known and unknown numbers. You can blacklist numbers starting or ending with a particular series. Spam messages can be blocked based on the keywords you provide. You can block international numbers, and report any unwanted number to TRAI (Telephone Regulatory Authority of India).

Privacy Advisor

Identify apps that might cost you money, harm your privacy, access the Internet or affect the overall security of your device. You can have a consolidated view of apps with various permissions like access to location, identity info, networks, personal data, accounts, device admin, etc. Depending on the permissions an app asks for, you can decide whether to keep it or uninstall it.

Security

Vulnerability Scan

Certain mobile apps installed on your phone might have security vulnerabilities which hackers can take advantage of. This feature of Fonetastic detects such vulnerabilities and brings them to your notice.

Fingerprint Unlock

Lets you unlock your phone using your fingerprint.

Web Security Multi-browser Support

To provide Web Security, Fonetastic supports the following Internet Browsers on your phone:

- › Default Browser
- › Google Chrome
- › Firefox
- › Maxthon
- › Opera & Opera Mini
- › Web Browser & Explorer
- › Next
- › APUS
- › Yolo
- › Crocodile
- › Private browsing features of other apps

Antivirus

Protect your device against malicious and harmful apps with real-time virus scans, scheduled, background, and cloud scans. View the list of threats detected during the scan under categories such as Unresolved, Resolved, and Quarantined.

Anti-Theft

Remotely lock your lost or stolen device and wipe its data by sending predefined messages. You can also track your phone's location on a map. If your device SIM card is changed, you will get a notification on your alternate contact number. A part of this feature is Intruder Detection. It captures photos of anyone who attempts to unlock your

device using a wrong PIN. You can also enable the anti-theft feature to lock your device if its SIM is changed, record video or audio of its nearby surrounding if it gets lost or stolen.

Block Websites

Stay protected against phishing and fake websites. Block access to websites by blacklisting their URLs or their category (like adult, violence, download, social networking, etc.). With this feature, you can manage Internet activity of other users on your mobile device.

Security Advisor

Based on your device's current security level, this feature advises you to configure certain settings which can help increase the overall security of your phone. For example, if the 'Screen Lock' setting is not enabled on your phone, then the Security Advisor will instruct you to enable it.

Secure Camera

Click photos using this feature, and they will be saved in the Gallery Vault automatically. Create a Secure Camera Shortcut on the device home screen to use the feature.

Anti-Spam

This feature helps you view and delete spam messages.

Note:

- If the count of spam messages reaches 10 or more, a notification card will be displayed at 9:00 AM for every 7 days.
- This card will be displayed only if the 'Block Numbers' feature is ON.

System Requirements

Supported Versions of Android

- › 4.0 and up.

Supported Resolutions of Android

- › 240 x 320
- › 320 x 480
- › 480 x 800
