

Quick Heal

Security Simplified

Quick Heal Mobile Security

Free protection for your Android phone against virus attacks, unwanted calls, and theft.

Product Highlights

With an easy-to-update virus protection and a dynamic yet simple interface, virus removal from your mobile has never been this easy!

- » Secures your financial transactions when you use payment apps.
 - » Powerful AntiVirus engine results in improved device performance so you spend less on mobile maintenance.
 - » Software simplifies configuration with easy-to-use mobile handset interface.
 - » Additional layer of device security with AppLock.
 - » Access to email and technical support from your mobile device.
 - » Facilitates sharing of the application installer file to other devices conveniently.
 - » Flexibility of individual feature purchase.
-

Feature List

Quick Heal Mobile Security helps you save time and ensure productivity by effortlessly blocking unwanted calls. Its unique and enhanced Anti-theft security protects your lost or stolen device from being misused.

This flexible feature offers the following functionalities:

- » **Quick Scan** - This is an on-demand scan that starts scanning your mobile device at your request.
- » **Scan** - Thoroughly scans your device and memory card.
- » **Vulnerability Scan** - Certain mobile apps installed on your phone might have security vulnerabilities which hackers can take advantage of. This feature detects such vulnerabilities and brings them to your notice.
- » **Scan SD Card** - Scans only the memory card.

- » **Scan Frequency** - Regularize scan with useful scan frequency such as scan while charging, scan once a day, once a week, or once a month.

Boost

Boost improves device performance by killing running apps at fixed schedule and even when the screen is locked.

AppLock

Lock any app on your mobile device with a PIN/pattern. AppLock adds additional layer of security and controls the app that may affect your privacy. You can lock both system and downloaded apps. It also shows a prompt before locking newly installed apps. Also, you can scramble keyboard for security of PIN usage.

Parental Control *Pro Feature*

Restrict inappropriate content for your children and give them a safe browsing experience. To control the online activities of your children, parental control provides options to allow or block websites and web categories.

Web Security

Excellent browsing and phishing protection by blocking malicious websites.

SafePe *Pro Feature*

SafePe helps to make safe financial transactions using the banking or financial or ecommerce or eWallets apps. SafePe checks whether the device environment is free from any malware or unknown vulnerabilities before performing any financial transaction using any app. This option runs a scan of device root access, device integrity, device environment, file system, and network. You also receive alert if the device is at risk before performing any transaction.

Battery Saver

Battery Saver kills the power consuming apps and increases battery life. You can save battery by setting appropriate brightness and screen timeout options. The battery consumption can also be limited by disabling Wi-Fi, Bluetooth, and auto-sync in Battery Saver mode.

Security Advisor

The Security Advisor guides you about the settings that affect the overall security of your Smartphone and redirects you to the respective screen to change the settings. Different Security Advisor settings are:

- Accounts and Sync

- Bluetooth
- Device Memory Encryption
- Hotspot and Tethering
- Anti-theft
- Background Scan
- Screen Lock
- Unknown App Sources
- USB Debugging
- Wi-Fi

Privacy Advisor

Privacy Advisor notifies about the apps that could affect your privacy. It also helps you review the permissions used by these apps, and you can decide whether you want to keep the apps or not. The feature monitors apps with permissions such as:

- Access to Accounts
- Access to Contacts
- Read Identity Info
- Tracking Location
- Access to Messages
- Access to Network

Device Privacy

The Device Privacy feature allows you to protect your privacy with the following functionalities:

Block Calls

With this feature you can easily block incoming calls from unknown or unwanted numbers. And now, you can also use this feature to block all numbers belonging to a particular series. For instance, if you block the series '8007', all phone numbers beginning with this series will be blocked from reaching you.

International Call Block

With Quick Heal Mobile Security, you can now also block unknown International calls.

Block Spam

This feature offers the following benefits:

- » **Fully Block** - Blocks all telemarketing calls and SMSs.
- » **Partially Block** - Blocks all telemarketing calls, and category based SMSs.
- » **Report A Number** - Allows you to raise a complaint with TRAI against unwanted telemarketing calls and SMSs.

Privacy Protection

Maintain a private contacts list and secure important call logs and messages from such contacts. You can customize contacts, call logs, and SMS logs to be private or both private and non-private based on your priority.

Network Monitor

Monitor and control the network data usage. View summary of your network setting in graphical representation. Set Mobile Network to control your data usage.

Data Protection

Securely delete all your personal data. Backup your data to Cloud and restore backup from Cloud as and when required.

Detect Unsecured Wi-Fi

Scans your mobile device and alerts you whenever it detects an unsecured Wi-Fi network. Connecting to such networks can let attackers steal your sensitive information like login ID and passwords, banking details, and other personal information.

On Install App Scan

Scans newly installed apps on the device to detect and prevent threats.

Fingerprint Unlock

If your device supports Fingerprint sensor, you can use your fingerprint to access features such as App Lock, Anti-Theft, & Parental Control. If your device supports fingerprint sensor, you can use your fingerprint to access features such as App Lock, Anti-Theft, & Parental Control.

Message Center

Displays important notifications which require your attention. The Message Center also displays the latest news, offers, updates, and important alerts from Quick Heal lab.

Scan App Before Download

Automatically scans apps even before you download them from the Google Play Store. It also informs you whether an app is safe to install or not. If it's not, the feature displays the risks of installing the app.

Silent Scan app before download

Silently scans app before download and notifies on malicious app detection.

Remote Device Management

This feature helps you manage your lost or stolen device via Quick Heal's Remote Device Management Portal. From this portal, you can perform the following actions:

- » Remotely lock, unlock, and erase data from your phone.
- » Track your phone's location.

Activity

Get in-depth reports on all the activities carried out by Quick Heal Mobile Security on your Android device. These include reports on:

- » Virus detections
- » Blocked calls
- » Activities related to anti-theft
- » Updates taken for virus definitions

Regular Automated Virus Updates

Takes automatic virus definition updates, so that your device remains secured from new and emerging security threats.

Call Forwarding

Helps you set a number to which all your incoming calls will get forwarded. You can also set this number by sending an SMS or via your RDM (Remote Device Management) account.

Note: This feature may not work on SIM cards in secondary SIM slots.

Background Scan

Provides automatic real-time virus and spyware scans with optional manual scan.

- » Ensures automatic protection from all kinds of malware threats.
- » If you have to use another memory card, the anti-virus engine scans the memory card before transferring any data.
- » Allows you to use your mobile device while the scan runs in the background.
- » Can be configured to exclude applications from scanning.
- » Can be configured to exclude folders from scanning.

Share App

With this feature, you can easily share your Quick Heal Mobile Security application with other Android devices. For this, you can use Bluetooth, Wi-Fi Direct, or NFC. You can also use other apps that allow application sharing between mobile devices.

Anti-Theft

Quick Heal's anti-theft technology prevents your device from being misused. It allows you to lock your device or erase its entire data remotely, if it gets lost or stolen. The technology offers the following layers of advanced protection to your Android:

- » **Remote Locking**
Makes your phone unusable if it gets lost or stolen.
- » **Mobile Tracking**
Helps in locating your lost or stolen device.
- » **SIM Change Notification**
If your device's SIM is changed, the new number will send an SMS to your alternate mobile number notifying about the SIM change.
- » **Block phone on SIM card change**
If the SIM card of your Smartphone is changed, Quick Heal's anti-theft feature will lock the phone and make it unusable.

- » **Remote Data Wipe**
Helps you delete data on your phone remotely.

- » **Customize Block Screen**
Customize details of block screen with custom message and alternate contact numbers. This feature is beneficial in case the device gets lost or is stolen.

Capture Intruder

If someone enters a wrong password 2 times consecutively (to unlock your device's lock screen), this feature will take snapshots using the front and rear camera.

Security Shield

The Security Shield displays the security level of your device and data through a graphical representation. By tapping this shield, you can configure the security settings of your device.

- » The orange circle indicates the current level of security on your device.
- » The check mark inside, indicates that your device is in a completely secured state. An exclamation mark would indicate that your device is unsecured.

Trusted SIMs List

Add multiple SIM numbers to Trusted SIMs List. This feature is beneficial for users using multiple SIMs. When the SIM is changed, the device is not blocked if its entry is present in the Trusted SIM list. Fifty (50) SIM numbers can be added to this list. Security alerts, and other important information related to IT security.

Individual Feature Purchase

Purchase individual feature subscription for limited period. This option gives the opportunity to utilize the most beneficial features such as SafePe and Parental Control.

Quick Settings Notification

This feature gives you quick shortcuts to various setting options on your device such as:

- » Wi-Fi
- » Bluetooth
- » Mobile Data
- » Brightness
- » Torch
